Major Offered At:

**CORVALLIS**

**Umpqua  
Community College**

## Environmental Engineering

Environmental Engineering is the engineering discipline that applies scientific and engineering principles to improve the natural environment, to provide healthy water, air, and land, and to remediate polluted sites. You will study the impact of engineering and chemical processes on the environment.

With an Environmental Engineering degree, you may work in an interdisciplinary team in public agencies, consulting firms, construction firms, military or Peace Corps, etc.

Common employment industries include:

- wastewater collection and treatment,
- pollution in surface and ground water,
- and water supply and distribution.

## Your Bachelor's Degree (BS) in the College of Engineering

- A minimum of 192 credits are required for graduation; 60 must be upper division (300 and 400-level courses).
- A maximum of 135 credits earned at a community college may be applied toward a bachelor's degree at OSU.
- Some courses can count towards your major and the Baccalaureate Core. Advisors can assist in selection.
