

Complete Streets and Multimodal Roadway Design

LEARNING OBJECTIVES

The workshop introduces the concepts that are part of the emerging emphasis on improving livability of urban centers. Performance measures, design assumptions, and other traditional practices will be compared with context sensitive alternatives that emphasize working with the local community to implement change. The workshop will introduce the sections of the Manual of Uniform Traffic Control Devices (MUTCD) for multimodal facilities and include bikeway and intersection treatments. The second session will refer to Oregon and Washington documents for design guidance. Throughout the workshop, case studies from projects will illustrate treatments.

COURSE LOCATION

Webinar format using Zoom

INSTRUCTIONAL STAFF

Peter Koonce, P.E., City of Portland
Conor Semler, Kittelson & Associates
Meredyth Sanders, Kittelson & Associates
Hermanus Steyn, P.E., Kittelson & Associates
Julia Knudsen, P.E., Kittelson & Associates

SCHEDULE

This two-part workshop meets on Wednesdays, February 22 and March 1, 2023. Instruction runs from 8:30am – 12:00pm.

Day 1- Wednesday, February 22

Policies and Traffic Engineering Principles
MUTCD Treatments and Applicability
Bikeway Facilities and Intersection Treatments

Day 2- Wednesday, March 1

Emerging Design Guidance
Applicability of Treatments and Project
Examples/Solutions

ENROLLMENT

Register and submit the course fee online. Make checks payable to The Kiewit Center and submit at least one week prior to the class. Zoom credentials will be provided after registration. If a registration must be canceled, a full refund can be made only if a notice of withdrawal is received at least one week prior to the course starting date. *Substitute attendees are encouraged.*
