Committee Charge:

To review College of Engineering curriculum and course proposals in an effort to implement the College's long-range educational mission and to ensure high quality academic programs for students. Through careful study, it recommends establishment of new programs and/or changes in existing programs, including major and minor curricular changes proposed by the academic units of the College. It attempts by coordination to bring about a suitable and rational balance of academic programs. It has an ongoing responsibility to assure that appropriate curricular policies are implemented efficiently and effectively without becoming unduly burdensome to faculty or disadvantaging students.

Committee Charge:

Serve as the academic home for programs/courses that affect multiple units. Cascades can't own curricular programs, but it doesn't work well to put their interdisciplinary programs within one specific school. Focus is on student success with an eye toward efficiency

Committee Charge:
To redefine the first-year experience and curriculum to emphasize skill building and early major exploration to allow students to find their major.

To lead the effort of redefining the first-year experience, college leadership identified school representatives to study the challenges and barriers our first-year students face. Almost all schools were represented, and all faculty on the taskforce had experience with existing first year curriculum, had led their curriculum committees or redesign efforts, or both. In addition, we included representation from the advising community (first year, and in-school).

The taskforce met over AY2019 to examine student challenges and evaluate our first-year experience. We also examined recommendations and best practices from peer institutions, professional organizations and engineering education researchers.

Committee Charge:
A focused taskforce to work out the high-level goals for the 1st year courses, and the shared CLO's for the courses. This committee has 1 rep from each curriculum committee with a chair serving as a resource for that group. That group will wrap up their work by the end of fall term.

The charge was to take what the standing committee proposed as potential CLOs for the three classes and improve them into a standard set of CLOs that will make sense for all units across the college. We were also focused on generating CLOs that are assessable and will relate to our new ABET metrics. The committee consisted of undergraduate curriculum and committee chairs from across the college, as well as first-year instructors. We had to complete a set of CLOs by December, such that these new courses could be processed in the CAT-II system during winter term (for the Fall 2020 pilot).

ENGR+ - COE Living Learning Community committee

School	Member (Fall 2020 - Winter 2021)
COE	Sarah Kyllo (chair)
COE	Hillary McMillan
COE	Sahid Rosado Lausell
MIME	Brian Fronk
UHDS	Ben Medeiros (Asst Dir of LLCs)

Committee Charge:
As an extension of the First Year Experience workgroup that has been meeting this year to re-design curriculum and the first-year experience for OSU College of Engineering students, this group has been tasked with researching what has been done in other Engineering Living Learning communities across the country, expanding the current COE LLC's vision and goals, and exploring new ways to help students feel a sense of community and connection to the College of Engineering as well as their peers. The committee seeks to recommend best practices, discuss ways to incorporate diversity and social justice into programming, and to connect what is happening in the classroom to a student's living experience with a goal of increasing first-year retention and assisting students to feel confident in their major choice through intentional exploration.

Outreach & Recruitment Committee

School	2020-2021
COE	Sahid Rosado-Lausell* (chair)
BEE	n/a
CBEE	Skip Rochefort
CCE	Kevin Houser
EECS - CS	Brandi Coker
NSE	Lizz Koch & Lily Ranjbar
MIME	Joe Agor, Brian Fronk & Onan Demirel

Committee Charge:

To ensure that all schools are participating in recruitment activities hosted by either OSU Admissions or the COE specifically. The committee also works to share the recruitment and outreach activities done by each of the schools so that we can share best practices and form collaborations among the schools. In the longer term, the committee seeks to promote more K-12 outreach activities in the state of Oregon by involving more faculty in COE.

Honors College Taskforce Committee

School	2020-2021
BEE	Rachel Jones
CBEE	Skip Rochefort
CCE	Michael Olsen
EECS	Pam VanLonden
MIME	Deborah Pence (Chair)
NSE	Natasha Mallette
Student (ESE)	Rachel Richards
Student (CE)	Hilary Chaimov

Committee Charge:

The College of Engineering (CoE) has historically offered Honors College (HC) course sections as an integrated part of its course offerings to students who are dually enrolled in CoE and HC. The CoE reaffirms its commitment to supporting its honors college students. It has been many years since a comprehensive exercise including reflection, evaluation, and development of recommendations have been conducted on the HC offerings provided within CoE.
