

Greetings,

It is a pleasure to welcome you to fall term 2020. In spite of these unusual circumstances, we look forward to supporting your academic success.

### **Space Resources**

The university has developed a space use plan that provides a reservations-based approach for [common study space](#) across campus. In addition, the College of Engineering is making some of its own space available that can be [reserved](#) by engineering students who require physical presence on campus.

Within the College of Engineering, three computer labs are open for drop-in use, in Kearney 302, Dearborn 115, and Kelley 1130. Each is equipped with general-access computers and high-speed printers. These labs are open Monday – Friday, 6 a.m. – 10 p.m.

### **Student Support Services**

OSU and COE offer many academic support resources both on campus and remotely, but I want to draw your attention to three specifically. [COE's Peer Tutoring Program](#) provides remote drop-in support for many engineering classes. The [Academic Success Center](#), operating remotely, is the best place to go if you are not sure where to start on your search for help. Finally, [Disability Access Services](#) can help you apply for the accommodations you need and ensure you are receiving them.

As always, COE's Office of Student Services, located in Johnson 114, is here to help and will be open Monday – Friday, 8 a.m. – noon and 1 – 5 p.m. If you are not physically on campus and need to connect, please email us at [askengineering@oregonstate.edu](mailto:askengineering@oregonstate.edu).

Sincerely,

Wade Marcum, Ph.D.  
Associate Dean for Undergraduate Programs  
Henry W. and Janice J. Schuette Professor in Nuclear Science and Engineering  
Oregon State University  
College of Engineering
