June 13 to August 19, 2022

Oregon State University is excited to announce summer in-person internships for undergraduate students interested in hands-on and interdisciplinary research on how the field of engineering can contribute towards building resilient communities. The Engineering for Bouncing Back (EBB) program will award approximately 10 fellowships of $5,000 per student, along with travel and subsistence support, to support participation in research projects. During the ten-week program, students will work with a faculty mentor and graduate student on a specific project and will develop research skills to increase graduate school opportunities.

• $5,000 fellowship
• Field trips for site-specific field work
• Workshops for professional skills development
